Redirects the heat into the room
Optional magnetic fireguard

Height 640mm
Width 725mm
Depth 350mm

Our factory showroom stocks standard stove models that you can take away today. Alternatively, within 7 days you could be installing a custom-made stove to suit your individual requirements.

Options include varying leg height, having the flue outlet at the top or rear, and a choice of stainless steel or brass fittings. For canopy models we can also add a motif and, for most stoves, you can choose a 12,000 or 20,000 Btu wrap around boiler to heat water or radiators.

We also keep a full range of accessories including replacement glass and can offer a refurbishment service to ensure your stove is always maintained in peak condition.

Pop in to our showroom or call us for more information. Our expert staff will be happy to advise you.
